

AMENE, Ter'Hemen

Frontend Developer | ReactJS Specialist

📍 Ado-Ekiti, Nigeria | 📞 +2348154230654 | ✉ [Email](#) | 🔗 [Linkedin](#) | 🌐 [Portfolio](#) | 📄 [Github](#)

Professional Summary:

Frontend Developer | React.js Specialist | Performance Optimizer

Impact-driven Frontend Developer with **3+ years** of experience creating high-performance, scalable web applications using **React.js**, **Redux**, **Zustand**, and **Tailwind CSS**. Consistently improved application load speeds by up to **40%**, optimized development processes to accelerate feature releases by **25%**, and enhanced user engagement with responsive, accessible interfaces. Known for clean architecture, proactive collaboration, and delivering products that scale from MVP to production-ready platforms.

Technical Skills:

- 🚀 **Frontend:** React.js, Tailwind CSS, Redux, Zustand, Context API, React Router
- 🚀 **Backend (Basic):** Node.js, Express.js, MongoDB
- 🚀 **Tools:** Git, GitHub, Postman, Figma, npm
- 🚀 **Other:** Responsive Design, RESTful APIs, Performance Optimization

Professional Experience:

Freelance Frontend Developer

Remote | 2020 – Present

- 🚀 Delivered **5+ production-grade web applications**, collectively supporting **1,000+ active users**.
- 🚀 Built and maintained reusable component libraries, **reducing feature delivery time by 25%** and improving maintainability.
- 🚀 Optimized web application performance, achieving **up to 40% faster load times** through **code-splitting**, **lazy loading**, and **state management improvements**.
- 🚀 Collaborated with cross-functional backend teams to integrate secure authentication (JWT, OAuth) and real-time CRUD operations.
- 🚀 Conducted detailed code reviews, upholding high-quality standards and boosting team productivity by promoting PR best practices.

Selected Projects:

Starlight Blog – Full-Stack MERN Blog Platform

🔗 [Live Site](#) | [GitHub](#)

- Developed a scalable, multi-user blog platform with **authentication**, **role-based access control**, and interactive features like **comments** and **likes**.
- Increased performance by **38%** through **dynamic imports** and **lazy loading** (verified via Google Lighthouse audits).
- Architected and integrated secure RESTful APIs for efficient content management.

Invoicer App (In Progress) – MERN-based Invoicing Platform

🔗 [GitHub](#)

- Designing a flexible invoicing system with **invoice generation**, **financial summaries**, and **PDF export capabilities**.
- Implemented **Zustand** and **Context API** for scalable, maintainable state management across modules.

Tally Call System – Hospital Queue Management Tool

🔗 [Live Site](#)

- Engineered a patient call management system, **automating manual processes** and **improving patient flow by 30%**.
- Built using the MERN stack with a real-time update mechanism for efficient room queue handling.

Other Projects:

- **Shalom Grace:** Developed a dynamic e-commerce platform for medical product sales.
- **Liberty Vineyard:** Created a church website featuring **event scheduling** and **donation management** modules.
- **THOG CLC:** Delivered a full-featured church content management system for sermon uploads, announcements, and member engagement.

Education:

Bachelor of Pharmacy (B. Pharm)
University of Jos, Nigeria | July 2007

Certifications and Training:

-  Responsive Web Design Certification | FreeCodeCamp | Feb 2023
-  Frontend Developer Training | Zuri Training | Aug 2023
-  HTML, CSS, JavaScript Course | W3Schools | 2020
